Cover letter
Brady Stroud

As a highly motivated and dedicated student with strong communication and interpersonal skills, I would like to apply for the position of Software Developer.

My name is Brady Stroud and I have spent the last 2 years learning as much as I can about the world of software development. I am only 17, but what I lack in experience, I make up in enthusiasm. I am extremely excited to start solving real world problems am built great software that will make the world a better place. As I am young, I can learn new languages and tools quickly. So far, I have become proficient in 3 different programming languages and multiple different development tools.

I can communicate my ideas well with others and write helpful, detailed documentation to ensure my work is understood correctly. I can read and interpret others ideas and understand how I can help them. Also, as I am still learning, I'm open to any criticism that can help me understand how I can develop beautiful software.

I understand and frequently use version control tool such as Git. I've created multiple GUIs using multiple tools. I am proficient in C#, Python, and Dart so I am excited to quickly learn these new skills. I am enthusiastic to learn about new development tools.
